Part 1 2018 Commissioner's Election Issues Commissioners Foolishly Abolish Coroner's Office!! Need to Reverse Stupidity before Disaster Hits in November Report and recommendation by Robert A. Williams

Wake up folks. Especially you 52,000 registered voters who slept through the 2017 Elections. 2018 is an Election Year in Cleveland County. The filing period for County Commissioner and other local, State, and Federal Offices begins this coming Monday at Noon. The Primary Elections will be May 8, 2018 and the General Election is November 6, 2018. But for those signing up to run for office, remember this. Filing for elected office starts Monday February 12, 2018 at Noon.

For those of you that are interested in the County Commissioner's race, to run for office or to become an informed voter, pay attention. We are going to provide information on the issues related to the Commissioners as well as the other offices.

For the Commissioner's Office we will start with an issue that many voters may not remember and an issue has not been talked about much. Early last year the Cleveland County Commissioners foolishly voted to have the State abolish the Office of Cleveland County Coroner effective in November 2018. Just AFTER the 2018 General Election. We will start our voter information program with this issue as it clearly shows what

not to do in an elected office. That is try to fix something that isn't broken because of foolish personal animosity and using false information and unethical methods to do it. The day of reckoning is coming soon for that stupid decision the Commissioners made. Read on!

This whole foolish episode was covered in great detail in my articles dated March 13, 2017 and May 30, 2017. If you wonder why I have used the word "foolish: so many times in regard to what the Commissioners did in this heinous example of a political hack job perpetrated by the whole slate of Cleveland County Commissioners, read these articles again and remember this. The Cleveland County Coroner who had his office abolished out from under him (for reasons described in detail in my previous articles as noted above) plans to sign up and run against the incumbent Commissioners in this years Commissioner's race. And this issue, which is just as politically salacious as the scandals and lawsuits at Cleveland Community College that are even now still reverberating through Cleveland County looking for a final solution. And, since nothing was wrong in the Coroners Office to begin with and plenty will go wrong without a County Coroner when the Coroner's office is abolished, if the Commissioners have any brains at all, they will reverse their efforts to abolish the Coroner's office well before November.

Read these article again folks. The County Commissioner's foolish action to abolish the Coroner's office is only exceeded by the foolishness of their reasons for doing it in the first place. Reread these articles and ask yourself, who needs foolish County Commissioners who would do such stupid things as this?

Attach the two articles HERE:

You can read that article here.

The second article can be found here.
