

Phony Privacy Alert Notice That Citizens For Good Government is NOT Private!! By Robert A. Williams

If you go to our website citizensforgoodgovernment.org and receive a Privacy warning that advises you NOT to open our website, do not despair. We do NOT receive or allow to be sent to us credit card numbers, Passwords, personal information and such. Therefore, we do NOT need to spend the extra money to have that high of a level of security, so we don't. It is just that simple.

These security warnings happen from time to time, especially around Election times. We believe that some or the people we tell the tales on may be responsible. We make the call to our website carrier and straighten it out as we will this time also. In the meantime, if you click on coming to our website, despite the warning, our website is still up and running. As always, please be assured that you and your computer will be safe when you come to our website. All you will receive is the TRUTH of the matter under discussion. Just what you were looking for in the first place.

Thanks,

Robert A. Williams
