

To All Anonymous Sources, Keep up the good work!!! For those calls that I missed, keep on trying!!

Folks, over the past 30 or so years, Robert A has received lots and lots of tips and other pertinent information from anonymous sources. And Robert A has a **100%** record of **NEVER** divulging the identity of those anonymous sources. From all of this clandestine communications Robert A has learned two very important things:

1. Officials in the various agencies within Cleveland County government positions, top to bottom, spend a great amount of time trying to search out and identify Robert A's
2. Very often County officials will plant false information to individuals that they suspect of supplying information to Robert A in hopes of that Robert A would take the bait and publish that false information in sufficient detail that the anonymous source could be identified.
3. Severe and sure retaliation efforts would immediately befall a source if their identity could be identified with some degree of assurance.

Right now:

- Robert A has in hand a message from an anonymous source regarding various alleged conflicts of interest within several inter-related entities presently working within the Law Enforcement Center and their various related functions and responsibilities. Robert A is “cogitating” over just how to proceed with that one.
- Another source, or perhaps the same source using other means of communication has unsuccessfully tried to make contact with Robert A several times. Please keep on trying.

Also note that Robert A has apparently gotten real close to the catastrophe regarding the failing financial stability of the CC Government as run by the inept and corrupt CC Commissioners, the County being broke and how the 2025 Property Tax Bills will be significantly increased within the next several months. Which has caused the CC Commissioners to issue phony Press Release to the Shelby Star that was published just a few days ago. A Press Release that contained outright and bald-faced lies. Lies that Robert A will disclose to the public and CC taxpayers in short order. Lies that were told and the truths that have gone untold. Dating back to 2008 when CC this latest financial disaster facing Cleveland County actually began.

So, folks, Stay tuned!! YOU ain't heard nothing yet!!!
